Rural, illiterate and insured women: The disproportionate rate of hysterectomies

Study: 70% Of Ops Performed In Pvt **Health Facilities**

Mumbai: An Indian woman living in a rural area, who is illiterate, obese, and has health insurance, is more likely to undergo a hysterectomy than an urban woman with a desk job, according to a new statistical analysis study. Agricultural women workers were 25% more likely to undergo, a hysterectomy compared to other occupation groups, said the study published in the "Journal of Medical Evidence" recently. It found a high unmeressary:—among In dian women. The prevalence of dam women. He prevalenc Mumbal: An Indian woman liv

In the absence of registration cer-tificates and licences, the graduating as pharmacists or start their own businesses. On Dec 31, PCI notified students that the exam had been de-ferred indefinitely and announced that it would allow registration and li-censing for one year for all students. PCI had previously problibited stu-dents from renewing their licences

PCI has allowed registration and issuance of licences to the 2022-23 batch after their exit exam, set for Oct 2024, was deferred

without passing the exit ream.

"After months of waiting, registration is finally underway, and licences are being issued, allowing us to start our careers or businesses," said a student, expressing gratitude towards PCI and the govt.

The statutory body has written to Union health ministry, seeking its nod to amend regulation 6 of DPEE 2022 under-section 100 PPharmacy Act 1948 to hold just one paper, instead of three.
